

For Immediate Release

Deerland Enzymes Announces Opening Of New Lab

October 20, 2009

Enzyme supplier, specialty formulator and contract manufacturer Deerland Enzymes, Kennesaw, GA, is proud to announce the opening of its new lab which is now complete and fully operational. Deerland Enzymes continues its dedication to their customers and the markets they serve by focusing on advancements in enzyme technology. The much expanded work stations and significant investments in equipment allow for increased capabilities in Quality Assurance, R&D, Application Development and Technical Support.

Staying true to its tagline “From Concept to Commercialization, We Add Value At Every Step™,” Deerland Enzymes is poised to serve its customers from the initial stages of customized product conceptualization, through the design phase, final formulation phase, and contract manufacturing services.

CEO Scott Ravech comments, “This new lab is another sign to the industry that Deerland is extremely committed to the needs of the customers we are privileged to serve. Since we focus on developing customized and proprietary products, we respect the need to protect confidential information. In doing so, we have also dedicated space in our current lab facility with restricted entry to support highly confidential collaborative product development, ensuring customers the highest level of safety and security when it comes to protecting their intellectual properties.

“With more stringent analytical requirements needed to support GMP certification and FDA compliance, companies must assume the responsibility of being able to provide accurate and on-time testing necessary to support the needs of the customers.” Added John Deaton, Lab Testing and Quality Control Manager for Deerland Enzymes.

With this new lab and continued focus on quality, accuracy and GMP Compliance, Deerland Enzymes raises the bar in the industry, providing confidence to its customers in every step of the development process.

About Deerland Enzymes:

“From Concept to Commercialization, We Add Value At Every Step™,”

Deerland Enzymes, Kennesaw, GA, offers a broad spectrum of plant, animal, fungal and bacterial-sourced enzymes. All are non-GMO and kosher where applicable. The company specializes in customized formulations, collaborating with customers to develop innovative and often proprietary solutions. Deerland Enzymes also performs specialty contract manufacturing services, including bulk single powders or blends, liquids, hard shell capsules and tablets as well as bottling and labeling.
